

EXCURE ALL ROUND VARNISHES

CHARACTERISTIC

The Excure all round varnishes are radical UV varnishes for all varnishing machines, and flexo units.

PROPERTIES

- ☞ All these varnishes can be applied wet-on-dry on conventional inks and wet-on-wet or wet-on-dry on Excure UV inks
- ☞ The surface tension of the cured film with non-gluable UV varnish is typically < 34 mN/m
- ☞ The surface tension of the cured film with gluable UV varnish is typically ± 38 mN/m
- ☞ The Excure all round varnishes are formulated with low toxic ingredients
- ☞ Low in wet odour and very low odour in the cured print
- ☞ The Excure all round varnishes have very good clarity
- ☞ The Excure all round varnishes are available press ready at optimal viscosity
- ☞ The Excure all round varnishes can be used with normal flexo plates
- ☞ Optimal resistance properties will be obtained 24 hours after printing

REMARKS

- ★ Both EPDM and nitril rollers are suitable when using our Excure all round varnishes.
- ★ Shelf life: all UV varnishes have a 12-month shelf life guarantee. This guarantee covers 12 months from the date of manufacture (which is mentioned on the label). In order to give this guarantee, certain recommendations must be followed: UV varnishes should be kept on stock at temperatures between 15 – 20°C and they should not be exposed to direct sunlight. If possible, store the varnish in a dark room.
- ★ Stir well before use

PRODUCT SAFETY

This varnish (or these inks) is (are) **NOT** suitable for **FOOD applications** unless a proper risk assessment proves that its use is safe (e.g. if the process rules out the possibility of set-off in the reel or stack AND if the design of the final printed article ensures reliable functional barrier properties to migration).
